FORT SUMNER - NEW MEXICO

Now the south pole might as well come in and surrender.

Mexico has been giving a lifelike imitation of Noah's flood.

Aeroplane need something comparable to nonskidding tires.

Lament of the north pole discoverer: "Nowhere to go but south!"

Why curl up in despair at the sight of a yellow leaf when the swimming is still good?

Paris plans to introduce a flying omnibus. It will make the underground transportation popular.

Why go to the north pole? Medicine hat is getting ready to turn out a superior line of goods from its weather factory.

The king of Greece wants to give up his job. And there do not appear to be many applicants on the waiting list for succession.

Now that the duke of the Abruzzi is planning to use the aeroplane in mountain climbing perhaps Weston will use it to make his feet happy.

Neither explorer seems to have thought of the simple expedient of substantiating his claims of discovery by cutting initials and the date on the pole.

Unless you know that the depth of the water is sufficient, look before you leap for one of those graceful dives of yours which are so greatly admired by your friends.

The fact that the Emperor of Austria has made a Baltimore girl a princess only emphasizes the fact that nature has made all American women queens in their own right.

The Crown Prince of Germany has blood-poisoning from the sting of a wasp. That is a little thing to seek prey in such eminence, but nowadays nobody is safe from getting "stung."

Now that the emperor of Austria has made an American girl a real princess a near-monarch of Portugal can marry her without losing caste. The young woman's money, however, needed no social white-wash.

It is impossible to divorce capital and labor in the public consideration. Either without the other is hopeless, and when both are working in harmony, as at present, the largest measure of profitable accomplishment is possible.

The law has its oddities and humors as well as other human occupations, and an instance of the former is the misfortune which befell a judge in Georgia who was put in jail for trying to break into a house to steal his own wife.

The Colorado School of Mines expects, if it can procure the necessary funds, to produce radium from the pitchblende ores of Gilpin county before the end of the present summer vacation. Colorado is a wonderful state, whose mineral resources constitute one of the richest natural treasures of the world.

A German princeling has announced that he is coming to this country to marry a rich American wife, so he can pay his debts. Our national pride will be hurt by the bold assertion that all he has to do is to come over and pick out a bride with a fortune, but unfortunately precedent shows that this foreign assurance of our American girls is based on facts too strong for denial.

As "hasenpfeffer" is a favorite German viand, those who here indulge in it have a warning at the beginning of the season for rabbits in the fact that a resident of Newark, N. J., had 22 No. 8 birdshot in his appendix, which was removed to relieve a severe attack of appendicitis. He had eaten "hasenpfeffer" which included a rabbit that was well riddled with shot.

The practical Germans are quick to seize a chance and turn it to account. They propose to establish an alrhp school at Friedrichshafen, the home of the Zeppelin industry, where the young idea may be trained to fly. The course of instruction will occupy two years and the graduates will be trained aviators. And who knows but degrees as aeronauts will yet be given by our universities and colleges?

President Taft has refused pardon to a man convicted of subornation of perjury. This crime is one which should be the last to appeal for clemency. It is deliberate, cold-blooded and it strikes at the very roots of the law's power properly to protect society from crime and criminals. The sanctity of the oath is the stronghold in which the law must trench itself. That broken down, no security is left.

It is true that all wealth comes from labor, but not necessarily from labor by the hands. The thinkers of the world have added inestimably to its development. It was a portrait painter who invented the telegraph, a college professor who produced the telephone, and the list might be extended almost indefinitely. It is well that to-day, with all our indulgence in rest and play, that we remember that it is intelligently directed energy of whatever kind which makes man better and helps along the world to the millennial dawn.

DR. COOK READY TO SHOW PROOF

DENMARK MAY BE ASKED TO WAIVE RIGHT TO FIRST EXAMINATION.

SOUTH POLE IS EASY

GREAT CROWDS GREET EXPLORER ON HIS ARRIVAL IN WASHINGTON.

Washington.—Frederick A. Cook, the Arctic explorer, announced Sunday night shortly after his arrival from New York to deliver his lecture, that he will acquiesce in the proposition that the University of Copenhagen be asked to waive its claim to a prior examination of his records, in order that the American Geographic societies, and other scientific societies in this country may be enabled to review his data. He said he would be satisfied to have the decisions of all these tribunals announced simultaneously.

Frankness characterized Dr. Cook's answers to every question, although the explorer added but little to what he already has said and published since he returned to civilization.

When asked if he would in the future fit up an expedition to go to the south pole, Dr. Cook said he was not yet prepared to answer on that point, but he added that the discovery of the south pole would be much easier than the north pole, and would be attended by far less dangerous risks. He pointed out that a probable route to the south pole would be along stretches of land on which stations might be established and that this would mean a quicker discovery.

Dr. Cook laughingly said he did not at this time feel any earnest desire to return to the north pole.

An enthusiastic crowd of several thousand people greeted Dr. Cook upon his arrival and the throngs in their eagerness to see or get near him were kept in check with difficulty by scores of policemen and detectives.

At the station there was a conspicuous lack of official courtesies to the explorer. None of the government or scientific officials were present to welcome him, nor were any civic bodies represented.

Dr. Cook was cheered as he passed through the streets.

Dr. Cook, in his lecture, deviated but slightly from his previous utterances in describing his dash to the pole, and sought to confine himself more to his travels and experiences than to discussions of criticisms aimed at him. He asserted that while he was glad to have discovered the pole and was glad to have returned to tell the world about it, he had endeavored to make it plain that his was a private expedition and not backed by the government or by a "polar trust."

Mining Congress Closes.

Goldfield, Nev.—The American Mining Congress closed its twelfth session here at noon Saturday after adopting a resolution calling upon the national government to pass laws against granting perpetual franchises for water power or water rights in western states, and urging that similar state legislation be passed without waiting for congressional action.

The apex law, under which the discoverer of a mineral lode or vein can follow it outside the lines of his claim, was another subject of discussion, and its repeal, with the substitution of a law making the side lines of a claim its limits when continued downward vertically was urged.

Wildcat mining schemes were placed under the ban by the congress which urged state and national legislation to prevent the operators of such schemes from diverting money of investors, which might otherwise be used in developing legitimate properties.

J. H. Richards of Boise, Ida., a retiring president of the congress, was given a handsome silver service by the delegates.

Los Angeles and Spokane have developed a lively rivalry for the next session of the congress. This question will be decided by the executive committee.

Object to Stomach Pump.

London.—Writs have been issued against Home Secretary Gladstone and the prison officials of Birmingham in connection with an action for assault for the forcible feeding with a stomach pump last week of a number of "suffragettes" who persisted in going on a "hunger strike" while in jail. The suffragette leaders contend that forcible feeding is illegal.

St. Louis Centennial Week.

St. Louis.—The overture to St. Louis' Centennial week was sounded by the whistles of the river front at noon Saturday when the second division of the Atlantic torpedo boat flotilla, headed by the flagship MacDonough, steamed into the harbor under escort of city, state and centennial officials and was moored. For five miles along the water front the four torpedo boats, MacDonough, Tirgo, Wilkes and Thornton, paraded, while tens of thousands flocked to the levees.

Townsite Opening

New town of TWO BUTTES, Colorado, will be opened October 22, 1909. Priority of selection determined by drawing. Town surrounded by 2,500 acres of irrigated Carya Act and State lands, besides vast area of best grazing land in Colorado. Ground floor opportunity for every kind retail mercantile business. Full information on application. THE TWO BUTTES IRRIGATION & RESERVOIR CO., Lamar, Colorado

Would Find Use for It.

After a day and a night spent in answering telephone calls from people who wanted the latest news from Peary and Dr. Cook, the secretary of one of the Arctic clubs had retired for a well-earned rest, when the persistent "phone bell rang again. A voice at the other end said:

"Do you want the ambulance sent right over?"

"What ambulance?" roared the irate secretary.

"Why, the one you sent for."

"I sent for no ambulance."

"You lie!"

The secretary gasped, then he screamed into the phone:

"Send it as soon as possible, and you come over, too, and I'll send you back in it!"

Come Home, Mother.

Mother, dear mother, come home from the club, and rustle some supper for me; 'tis time you were here working over the grub and getting things ready for tea. The table's not set nor the teakettle boiled, the vegetables are not prepared; no wonder my temper and feelings are roiled, though 'tis doubtful, indeed, if you cared. Come home, come home, come ho-ho-home! Yes, cut your symposium down a wee bit, dear mother, and hustle right home!—Los Angeles Express.

Repartee in the Bright Family.

"The newspapers are making a great stir about men's disinclination to marry," remarked Mrs. Bright.

"The Bible says there are no marriages in heaven," commented Mr. B.

"And what has that to do with us?" Bright laughed.

"Perhaps they are figuring on having a little heaven on earth."

CHILDREN SHOWED IT

Effect of Their Warm Drink in the Morning.

A year ago I was a wreck from coffee drinking and was on the point of giving up my position in the school room because of nervousness.

"I was telling a friend about it and she said, 'We drink nothing at meal time but Postum, and it is such a comfort to have something we can enjoy drinking with the children.'"

"I was astonished that she would allow the children to drink any kind of coffee, but she said Postum was the most healthful drink in the world for children as well as for older ones, and that the condition of both the children and adults showed that to be a fact."

"My first trial was a failure. The cook boiled it four or five minutes and it tasted so flat that I was in despair but determined to give it one more trial. This time we followed the directions and boiled it fifteen minutes after the boiling began. It was a decided success and I was completely won by its rich delicious flavor. In a short time I noticed a decided improvement in my condition and kept growing better month after month, until now I am perfectly healthy, and do my work in the school room with ease and pleasure. I would not return to the nerve-debilitating regular coffee for any money."

Read the famous little "Health Classic," "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.
